DataSys to Help Bay Cove Human Services Expand Reach by Contributing to Long-term Strategy

Bay Cove Human Services appoints DataSys President Lisa Daigle to its Board of Advisors and Technology Advisory Committee

Marlborough, MA – September 23, 2005 – When it comes to improving the quality of individual lives, Bay Cove Human Services must capitalize on every available resource. Bay Cove is a private, not-for-profit corporation that provides highly specialized residential, day, outpatient, and educational services to children and adults with a broad array of needs. The organization succeeds thanks to the efforts of more than 750 active and dedicated employees, the contributions of Bay Cove's growing community of donors, and an annual budget of close to \$40 million.

Among the countless volunteers who support Bay Cove's mission are the members of Bay Cove's new Board of Advocates. The Board includes high-level leaders from business, government, and other organizations, each of whom is knowledgeable about and supportive of the agency's programs and services. Their role is to ensure Bay Cove's viability and visibility, and to provide input on matters of critical or strategic significance to the organization.

DataSys President Lisa Daigle was among the members who attended the Board of Advocates' meeting on September 23, 2005. The group heard presentations from Bay Cove senior management and Mayor Tom Menino, along with insightful presentations on Bay Cove's service initiatives.

"It was a compelling day," Daigle says. "I've been associated with Bay Cove since 1999, when DataSys first began implementing and supporting Great Plains for the organization. I'm honored to have this opportunity to get more involved and to help them reach their goals. I am also pleased to be serving on Bay Cove's Technology Advisory Committee, which provides input on Bay Cove's strategic direction for information technology. Bay Cove's IT department currently supports almost 1,000 users and a variety of mission-critical business applications; the department is essential to helping Bay Cove meet its human services goals."

This level of involvement in the nonprofit arena is not unusual for DataSys, which serves more than 35 customers in the health and human services industry. "It's a win-win endeavor," explains Daigle. "We understand these organizations' valuable role in the community, and we show our support through charitable contributions. And, this knowledge allows us to better advise them on how to use Great Plains to meet their business goals and gain financial insight.

About Bay Cove Human Services

Bay Cove Human Services is a private, not-for-profit corporation that provides highly specialized residential, day, outpatient, and educational services to children and adults with a broad array of disabilities.
