DataSys Welcomes 275th Customer, The Brain Tumor Society

Marlborough, Mass. – April 24, 2008

The Brain Tumor Society (TBTS), located in Watertown, MA, attained a prestigious distinction in 2008: they became DataSys Corporation's 275th customer.

The real prestige, however, is reserved for TBTS' vision—*a world without brain tumors*. Their mission is two-fold: they provide funds for research projects that enhance treatments and seek cures, and they improve the quality of life for brain tumor patients, survivors, and their families through providing access to psychosocial support, information, and resources.

TBTS purchased Great Plains in order to implement an improved financial system for its growing organization especially in the area of financial reporting. They will partner with DataSys Corporation to meet that important goal.

According to DataSys' President, Lisa Daigle, "My original vision for DataSys was *to be known as the company that cares*. That vision goes beyond providing outstanding implementation services, and encompasses the philosophy that we care deeply about our customers' mission and their contribution to society."

According to Bill Picard, TBTS' Controller, "In addition to DataSys' in-depth knowledge of Dynamics GP, experience and track record, we ultimately chose DataSys as our implementation partner because of the caliber of its people and their unwavering commitment to each client."

To learn more about TBTS, please visit their Website at www.tbts.org.

About DataSys Corporation

DataSys Corporation, a Microsoft Certified Business Solutions Partner specializing in the implementation of Microsoft Dynamics GP, helps midmarket companies meet their objectives by improving access to mission-critical information. For over ten years, DataSys has built long-term productive relationships that benefit from a deep understanding of its clients' business and cumulative years of experience with Great Plains software. DataSys harnesses the power of Great Plains' functionality, reporting, integration, and customization capabilities to deliver a comprehensive business management solution that expedites core financials, human resources, payroll, project accounting, distribution, warehouse management, and e-business.
