

## Tip of the Month – December 2002

### **Great Plains Graphical Reports**

Do you find the Microsoft Great Plains standard reports unappealing and hard to read? Well, suffer no more! You can access the Microsoft Great Plains Reports Library via CustomerSource/Downloads (the Microsoft Great Plains Web site for customers) and download hundreds of Great Plains graphical reports!

These reports replace your current standard reports. If you have already modified a standard report, you'll need to make the same modifications to the graphical report you download. Don't forget to set security!

Please contact DataSys if you need your CustomerSource user ID and password, or if you need assistance in locating the Reports Library.
