Customers Flock to DataSys Summer Seminars

Marlborough, Mass. – August 18, 2011

DataSys Corporation hosted seminars in Boston and Marlborough for more than 50 customers, and then followed up with a Webinar. This summer's seminar reinforced support expiration dates from Microsoft, emphasized the importance of installing service packs, introduced customers to new reporting technologies, and de-mystified the migration to Management Reporter.

Michael Newman, Executive Vice President, piqued attendees' interest with a demo on Excel Report Integration. David Laster, Senior Applications Consultant, toured attendees' through SQL Reporting Services. Both Excel Report Integration and Reporting Services are bundled with GP10 and GP2010 (Release 11), and customers can be operational within a few hours. These tools include almost 200 pre-formatted views with flexible options to filter, search, and export.

David Laster reviewed three approaches to migrating from FRx to Management Reporter, and announced that DataSys will be holding classes on Migrating to Management Reporter and Mastering FRx.

Marlborough attendees feasted on barbecue food from the local restaurant Firefly's. Boston attendees enjoyed the gorgeous skyline from the conference room of DataSys' long-standing customer, IHRDC (www.IHRDC.com) and were treated to a lunchbox from Panera. Customers mingled before the events, and a good time was had by all!

Special note was made of the longevity of DataSys' seminar team: Mike Newman's was approaching his 11th year of service, with David Laster rounding the eight-year corner in fall, and Diane Reilly serving as Office Manager for more than 12 years.
